FREEJET 700 TX

Large Format Direct to Garment Printer

Unique WetCap Cleaning System

Auto Adjustable Height Adjustment

Advanced Control Functions

Removable Garment Plattens

Easy to use Rip Software

Our unique WetCap System is fully integrated to the printers cleaning System it keeps the print head always clean and prevents drying of the ink channels while printer is idle.

Infrared Laser allows the automatic adjustment of the Product Height. Laser also protects the print head from running across any garment keeping your print head like new!

Take full control of your printer direct from the Integrated control panel. functions Include **Auto Cleaning, Step and Repeat, Print Head Manager, Micro Movements** and more!

Removable Plattens allow you unlimited versatility of printable items. With a generous adjustable height you can print on a wider array of products

Built From the Ground up as a software for Direct to Garment printing, our software allows you fast and easy image setup with advanced functions in an easy to use interface.
