1596 SportPro Defender Dye Blocking Grey Underbase

Excalibur 1596 SportPro Defender Grey is a first down underbase or a last down backer for cold peel transfers to block dye molecules in 100% polyester dark colored garments that are prone to dye migration. The particles in Excalibur 1596 SportPro Defender act as filters to filter out dye molecules which can migrate up through the ink film during the curing or heat transfer process. Excalibur 1596 SportPro Defender prevents dye migration on many 100% polyester fabrics where normal low-bleed plastisol inks fail miserably.
