

Excalibur™

Technologically Superior Ink

102 Matte Additive

Excalibur Matte Additive is a dulling paste which can be mixed into Plastisol ink to greatly reduce the gloss. The result is a smooth matte print. Matte additive does not contain any puffing agents. Matte additive will also reduce the "tack" or stickiness of inks. Matte additive is in paste form and must be stirred well into the plastisol ink at the ratio of 6% to 10% by weight.
