

# RUBYSTICK™ FOAM RUBBER CLEANING STICK

This is the **genuine RUBYSTICK™** Clean Stick R product manufactured in Japan and imported directly by us. Soft, yet firm, **super porous** polyurethane fiber that allows extreme capillary absorption of cleaning fluids and dust/debris from surface being cleaned. Rubystick head is slant cut to fit into extremely tight places. Super absorbent Rubystick head is heat, mild solvent and corrosion resistant.

These Rubystick rubber cleaning stick swabs are NOT imitations. These **Rubysticks** are NOT cheap polyester foam swabs that break apart and rip.

Used in clean room environments, electronics production, electronics repair, delicate instrument cleaning, quality control, gunsmithing, inkjet printhead cleaning, lens degreasing and cleaning, optical glass cleaning (such as microscopes and surgeon's loupes).

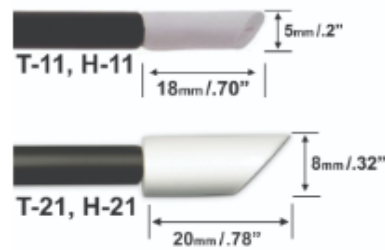

**RUBYSTICK™** super absorbent, smooth rubber cleaning stick. We are the USA's largest importer & reseller of these. MANY *industrial* inkjet printhead and printer manufacturers are now specifying these to be used to clean printheads (Kyocera, Spectra, Konica-Minolta, Mutoh, Roland, Brother, Kornit, Epson, HP, Cannon etc..)

Direct-to-Garment inkjet manufacturers are now recommending Rubystick to clean all printheads. Brother Part # SB7008, Brother GTX, Brother GT-3 Gaffi Tee, GT-541, GT-782, Brother Part # SB7008001, Epson F2000 Series, Kornit, Aeon and all other high speed graphics inkjet printers: Mimaki, Epson, Roland, Mutoh, Mimaki

**RECYCLE / REUSE:** We recommend buying 1 Rubystick for every 1 extra heads. That will give you double the milage. Do not overuse the Rubystick too many times. Foreign matter, dust dirt ink residue oil residue and whatever else can accumulate on the handle and contaminate the pure head. Recycling only ONE TIME will save 50% on cost.

## USES:

- Clean room swab
- Electronics manufacture
- Electronics repair
- Watch cleaning
- Watch bezel cleaning
- Optical glass cleaning
- Gunsmiths
- Inkjet printhead cleaning

## SPECIFICATIONS:

- 5mm dia x 18mm Round *Slant Cut* Head
- .2" dia x .787" long
- Capillary Polyurethane Rubber Head
- 106mm Overall Length with Polypropylene Handle
- 4.17" Overall Length with Polypropylene Handle
- 50-70 Micron Porosity
- 266f Heat Resistant

## SPECIFICATIONS:

## H-21 Rubyhead

- 8mm dia x 20mm Round *Slant Cut* Head
- .31" dia x .787" long
- Capillary Polyurethane Rubber Head
- 106mm Overall Length with Polypropylene Handle
- 4.17" Overall Length with Polypropylene Handle
- 50-70 Micron Porosity
- 266f Heat Resistant
- Brother GTX Part # SB7008001 Clean Stick R
